

Entering Students To Be Welcomed By Dr. Compton

Professor Rogers Toastmaster
At All-Technology
Smoker

Other Professors Will Speak

Official welcome from President Karl T. Compton will be extended to entering students at the All-Tech-Smoker, Monday evening at 6:30 P.M. in the Main Hall of Walker Memorial.

Professor Robert E. Rogers of the English Department, as Master of Ceremonies, will introduce the main speakers of the evening. Professor Frederick G. Fassett, Jr., will speak on Technology publications, and Dr. Rockwell of the Advisory Council on Athletics on sports at the Institute. Tech Show will be discussed by Professor William C. Greene.

The after dinner talks will be followed by the presentation of the Technique Cup and athletic demonstrations in wrestling and boxing.

Admission will be only by free ticket which may be obtained in the Main Lobby on Registration Day. Fathers or uncles are invited to accompany the students as guests.

Ties Will Be Sold Monday

Quadrangle Club And Freshman
Rules Committee To Sell
Freshman Ties

Freshman ties—the distinguishing insignia of every entering class at Technology—will be on sale in the Main Lobby and in the freshman registration rooms all during Registration Day, Monday, September 30.

These ties are worn by all members of the freshman class, in compliance with the Freshman Rules. The colors are those of the Institute, silver gray and cardinal red.

Quadrangle Club will again aid in the sale of freshman ties, and in conjunction with the Freshman Rules Committee will endeavor to contact every member of the Class of 1939 during the proceedings on registration day. Quadrangle Club is a freshman-sophomore organization promoting good will and close relationship between the underclassmen.

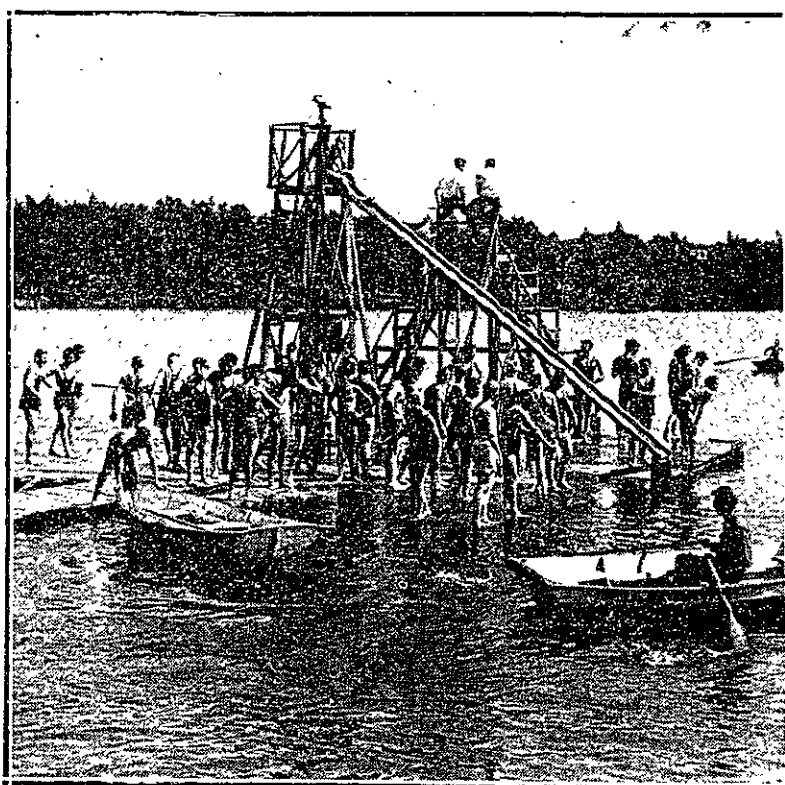

Freshman Rules

A spirit of comradeship and a healthy school spirit are the ideals which the Freshman Rules Committee is attempting to instill into the members of the entering class, through its administration of the Freshman

10th Annual Freshman Camp Will Be Largest Ever On Shores of Lake Massapoag

Scene on Swimming Float at Freshman Camp

Waiting List Announced For
First Time in Camp
History

T.C.A. Provides Sleeping
Accommodations for 307

1500 Blankets Borrowed From
Army To Keep Frosh And
Guests Warm

The largest Freshman Camp in its ten-year history will be transported to the shores of Lake Massapoag in nine buses this afternoon. The Technology Christian Association, under whose direction the camp has been run ever since its inception, has announced that for the first time in its history there is a waiting list. William B. Burnet, '37, in charge of the enterprise, stated that sleeping accommodations have been provided for 307 people. The program will essentially be the same one that has been used for the past few years.

Registration Runs Riot

The registration has been exceptional from the very beginning. Six requests for accommodations reached the T.C.A. office before the literature had been sent out. Last year the first acceptance was received August 25. This year the first came in more than a month earlier, and by August 25, 136 registrations had been received. Officials stated that the main reason for this condition is the increased prestige which the camp has made for itself. In proof of this contention they point out the registration previous to the announcement of camp.

The Freshman Camp is held annually under the auspices of the Technology Christian Association at the Cambridge Y.M.C.A. Camp on the shores of Lake Massapoag during the week end just preceding Registration Day. The purpose of the camp is to

FRESHMAN CAMP SCHEDULE

Friday

P.M.
2:30 Assembly at Walker Memorial to leave for Camp.
5:00 Swim.
6:00 Supper.
History of Camp Massapoag—Mr. Gridley.
7:30 Assembly in Friendship Lodge—John C. Austin, President of Class of '36, in charge.
Welcome—Dr. Vannevar Bush, Vice-President of the Institute and Dean of Engineering.
"History and Traditions of the Institute"—Professor Henry G. Pearson, Department of English.
"Student Government at Technology"—John C. Austin, '36.
Announcement of All-Tech Smoker to be held Monday evening, representative of the Institute Committee.
Tech songs and cheers—Obie Denison, '11.
9:45 Councillors' meeting at Friendship Lodge.
10:00 Taps.

Saturday

A.M.
7:00 Reveille; Setting up exercises—Roger E. Needham, '36.
7:30 Breakfast and announcements.
8:00 Camp details.
8:30 Discussions—Newton C. Fetter.
9:15 Presentation of activities—John C. Austin, '36.
9:45 Group activities meetings in tents.
10:20 Presentation of athletics—Fletcher P. Thornton, '36.
11:00 Group meetings for athletics.
11:30 Swim.
P.M.
12:15 Dinner and announcements.
1:45 Athletic program: baseball, crew, rifle, etc.
3:30 Assembly in Council Ring; Faculty speakers.
4:15 Athletic program continued: Faculty indoor baseball game.
5:30 Swim.
6:15 Supper and announcements.
7:10 Assembly in Council Ring; Speakers.
8:00 Assembly in Friendship Lodge. Talk by Dr. Croke.
8:30 Movies—Professor Charles E. Locke.
9:45 Councillors' meeting.
10:00 Taps.

Sunday

A.M.
7:30 Reveille; Setting up exercises; Dip.
8:00 Breakfast and announcements.
8:45 Camp details.
9:30 Track meet—Coach Oscar Hedlund in charge.
11:00 Discussions—Newton C. Fetter.
12:00 Swim.
P.M.
1:00 Dinner and announcements.
2:30 Baseball finals, crew, rifle, etc.
4:45 Vesper Service—Dr. Arthur Lee Kinsolving.
5:30 Swim.
6:15 Supper and announcements.
7:15 Open Forum in Council Ring.
Interfraternity Conference—Scott Rethorst.
Explanation of marking system—Harry Essley.
5:15 Club—George Robinson.
Undergraduate Houses—Brenton Lowe.
8:00 Movies in Friendship Lodge—Coach Oscar Hedlund.
10:00 Taps.

Monday

A.M.
6:45 Reveille.
7:15 Breakfast and announcements.
8:00 Departure for Cambridge in time for Registration.

Fraternity Rushing Forbidden at Camp

Inter - Fraternity Conference
Sanctions Law

Fraternity rushing at Freshman Camp is strictly forbidden, according to rules formulated by those in charge and sanctioned by the Inter-Fraternity Conference. In order to enforce this ruling three men have been assigned to guard the entrances and see that no unauthorized persons are at camp.

As has been the custom for the past few years, there can be no semblance of rushing from the time the freshmen enter the busses to the time they return to Technology on Registration Day. All freshmen must go to camp and return from camp in the official busses. No one will be allowed to enter the camp grounds unless authorized to do so by the men in charge. Similarly, no automobiles will be allowed on the camp grounds without a special authorization.

Letters have been sent to the presidents of the various fraternities on the campus advising them of that ruling and notifying them that the Inter-Fraternity Conference sanctions the law.

Freshmen Invited To Tech Smoker Friday

Opportunity To Discuss Work
Of The Paper

Incoming students interested in joining The Tech will be welcomed at a smoker next Friday, October 4th, at 5 o'clock, in the Faculty Dining Room at Walker Memorial. Free smokes, cider and doughnuts will be served to those attending.

Heads of the various departments will be present to meet the freshmen and discuss with them the work that is to be done on the Tech.

The Faculty Room where the smoker will be held is on the second floor of Walker, in the rear it may be reached from the west balcony of the main hall.

The Tech a semi-weekly publication, edited and managed entirely by the students themselves, is the oldest activity at Tech. The first issue was published in 1881, and since that time it has been regularly published as the only news organ in the school.

5:15 Club Opens Season With Membership Drive

Reduced Dues Result of Former
Profitable Season

Commuters will commence this year's activities of the 5:15 Club, their organization, with a membership drive on Registration Day in the Main Lobby. Dues for the coming year have been set at one dollar, which includes the club's pin. Those who already have the pin will pay fifty cents.

Low dues are a result of the profitable year the commuter's association had last season. A profit was made on the New Year's Party of the club which will enable the officers to better outfit the room and to run several free dances for members.

Besides the booth in the Lobby, solicitors will also be at a table near the freshman registration room from 9 until 4 o'clock.

Massapoag Wilds Scene of Man-Hunt; Freshmen Seek Elusive Soph President

Donald Weir, President of the class of 1938, is a hunted man for the next three days. For the tenth consecutive time, the President of the Sophomore Class is to be immersed in the cool waters of Lake Massapoag at the hands of the Freshman Campers.

Freshman are expected to go over the surrounding vicinity with a fine tooth comb trying to ferret out the undoubtedly hidden Sophomore President, and to spread an alarm if he is disclosed. Tradition demands that he is to accept the generosity of the freshmen when found. He will be present at the camp but will not be within the sight of anyone until sought out and given his ducking.

A picture of the culprit is to be found elsewhere in the paper to guide the freshmen on their man-hunt. They are warned, however, not to trust too much to appearance since ingenious disguises have been employed by the hunted men in previous years.

Although hopelessly outnumbered, the Sophomore President has promised to fight to the last breath and stitch of clothing on him. The freshman class is advised to procure

Donald Weir
President of Sophomore Class

enough material to nab the victim such as rope, straps and sheets.

HERITAGE

HOW TO MAKE THE MOST OF IT

TECHNOLOGY as a whole stands ready to welcome the incoming class into its halls. The administration wishes the new additions to the Institute all success in their endeavors. The faculty looks forward with a degree of anticipation to the coming year, to the new faces, new materials, and new problems. The students who have learned to find their way around from one building to another are always ready to act as guides for those to whom the Institute road map offers difficulties. The activities are looking for new men to fill their ranks. Sports managers will soon be rounding up candidates. In short, the Institute lays before the first year student all the means it has to aid him in utilizing to the full the facilities for scholastic, athletic, social and activity pursuits during his four year stay.

Technology is a friendly place. It is a place where a student can enlist the advice of his professors as well as course heads in solving any school problem with which he is faced. The Institute is designed to find out what you want and give it to you.

After you have signed your name a large number of times on registration day and become installed in your section, you will begin to know some of your classmates. You will realize that studies do not take up all of your time (in spite of the fact that your schedule is not light) and that the recreational, the social, and the athletic aspects of your life at Tech will assume great importance during your college years.

If you think it is an easy thing to balance your time so as to obtain a maximum benefit from your studies, your activity, and your sport, just ask a friend or two who has been here two or three years. It is not an easy task. It will deserve much thought. Perhaps you know now what activity you would like most to take part in. The problem resolves itself immediately into finding all you can about that organization and going into it for all you can put into it, and likewise, all you can get out of it.

If you are vague on the situation, you will find activity representatives eager to expound the advantages of their activities in making for a balanced life at Technology. This will provide you with information to make your choice.

But which ever way you stand, decided or undecided, as to what outside work you would like to become familiar with, go out for some activity! It will be worth while.

Don't expect to get an education at the Institute. If you are diligent, the best you can get is an index to an education. You will at least get one thing at Technology: you will find out that there are many things you don't know about. And if you are lucky, you may find out what you want to do when you get out of college. Technology doesn't give all the

answers to the problems you will run into in later life. But it will help you in developing methods of solving them, which is the most important thing.

If you learn while you are here how to approach a problem in a straightforward, clear-headed manner, if you can learn to be objective enough to see problems from many sides, if you can be unprejudiced in your investigations, you will have received something at the Institute that will take you far in life.

The road ahead is not easy. The founders of a college generally see to it that you don't get a degree unless you are worth it. But the road has a lot of fun along the way, and you won't lack company. You will have lots of friends, unless you put a barrier around yourself. There is always help along the road, too, when you need it. If the editor may for once abandon the editorial "we", I wish you the greatest success.

GET GOING, '39

GROUND WORK FOR CLASS SPIRIT

A LITTLE tradition at the Institute, a tradition which by the way is the point of departure for freshman-sophomore rivalry always provides a bit of engaging fun for the first year men at Freshman Camp. It would be sad indeed if the sophomore president missed his ducking in the chilly waters of the Massapoag.

The moral to the whole affair, which, if nothing amiss stems the natural ebb and flow of events at Camp, will probably take place tomorrow, is that class spirit among freshmen should have its roots at Camp.

Only two hundred new men out of the entering class have the opportunity of developing the groundwork for a solid class spirit. They will make friends at Camp which will last four years, and perhaps a lifetime. They are joined by a common aim and by good fellowship. But first of all they are joined in the common purpose tossing the sophomore president in the lake.

Then comes the problem of preparing for Field Day. One thing can win Field Day for the Freshman Class. That one thing is organization. To have organization you have to pull together just as in a tug o' war. So you men who are entering Technology this term, get to know each other, make plans, organize your teams early, get in a lot of practice, or the sophomore class will get ahead of you in the struggle the first of next November.

TANGIBLE BENEFITS

UNDERGRADUATE PUBLICATIONS

TO my mind, college papers, magazines, and year books offer an unexcelled opportunity for varied, instructive, and often profitable extra-curricular activities. They should be supported and encouraged by students, Faculty, and Alumni alike." So says Henry Gratton Doyle, dean of the Junior College, George Washington University.

Undergraduate publications at Technology have acquired a reputation for offering tangible benefits to those students who take an active part in them, and any Institute graduates who have been on the publications always recall with pleasure the experience they had in them. In brief, there is assurance on all sides that time spent in active and well-planned work on any undergraduate publication at the Institute brings rewards from all points of view.

Scattered through the freshman class is probably a large number of men who interested in finding out what newspapers and newspaper work are like. It is to those we speak when we say: "Come down and see what The Tech has to offer." There is no better or faster way of discovering whether you are interested in newspaper work at the Institute than to get acquainted with a staff member of this paper and have him answer your questions about it. And the sooner you find out whether or not it is what you want, the easier it becomes to get off on the right foot.

There is no need to be hasty in making up your mind as to what publication interests you most. Within the next two weeks, T.E.N., Voo Doo, Technique, and The Tech will be having smokers for men interested in the publications. In cases where the individual has no particular leanings but "likes to write" it may take a little experimenting to find the line of work best suited to his needs.

The publication offices will be open a large part of the time from now on. Drop in on any of them and get first hand information. New men are always welcome.

Welcome

Once we welcomed a freshman with open arms. But he was so burdened with cough medicine, rubbers, long woolen underwear and college entrance algebra guides (guaranteed to prepare you for C. E. E. B. exams only 25 cents), that when we had finally untangled ourselves, we could not convince him that this was just the beginning of a major course in de-sophistication.

So we don't say "Welcome, frosh! Tech is a hard school but perseverance will win out," (Three (3) cheers for the Rover boys). After all, freshmen occur annually, and the species is a fairly constant variable (shades of N. H. Frank). And freshmen will continue to be abducted by Sophomores and dropped in varying states of embarrassment in front of the "Met", and vice versa until evolution produces a breed sans pants which will effectively put a stop to fully fifty per cent of the Sophomore pranks.

Disillusionment

We are not above presenting Technology as it appears to the blasé upperclassman, however, just to compensate for the brilliant prospect which hopeful Mister "39" has been receiving ever since he passed his college boards or strode nonchalantly through his neighborhood remarking "Oh yes, I was admitted to M. I. T. without exam on the basis of my scholastic record." So we offer the following definitions.

Technology is a large building in Cambridge surrounded by the Charles River, Walker, the Coop, the dorms and the Tech Delicatessen. It is inhabited mostly by Dr. Van De Graaf, his high voltage apparatus, Prof. Robert E. (this is life) Rogers, and electrical engineers.

The Coop

The Coop, by the way, is an organization for the financial advancement of the management of the Coop. Among other changes we would like to see the Technology branch of the Harvard Co-operative Society offer a straight ten per cent discount instead of offering engineers a chance to set themselves up in business just as if they had bought a store.

Warning

In closing, we warn the freshmen of co-eds who are insidious creatures (compare last year's Lounger columns

at the beginning and end of the term and be warned thereby). We call their attention to Voo Dooers by which the Institute is infested. And for the first week or so we advise them to dredge their coffee and soup before lifting the saucer to their lips, regardless of where they eat. It is very discouraging to an inexperienced stomach to come upon certain things unexpectedly.

Reviews and Previews

AT THE SHOWS

The Theatre Guild will open its Boston season at the Colonial Theatre on Monday evening, Sept. 30, with a presentation of "Porgy and Bess", George Gershwin's folk opera. The opening here, a world premiere, reveals the first operatic score by a native musician who is unique in his ability to write both popular tunes and important orchestral pieces, including the far-famed "Rhapsody in Blue".

The story of the opera is taken from the play "Porgy", an outstanding success when it was produced by the Guild eight years ago. DuBose Heyward, author of the play, has written the libretto for the opera, and is co-author of the lyrics with Ira Gershwin. Alexander Smallens, one of the conductors of the Philadelphia orchestra, will lead the company of 45 musicians. Seregi Soudeikine, famed scenic designer, has provided the settings.

At the Shubert, Mary Boland continues in the newest musical comedy hit "Jubilee". The cast includes 100 people with such outstanding members as June Knight and Melville Cooper. "Jubilee" will leave Boston on Oct. 5.

At the Copley, Mary Young in "Post Road" opens tonight for a 2 weeks engagement.

Next Thursday will see the Boston opening of "The Great Waltz" at the Opera House. This show comes direct from the Center Theatre, Radio City in Rockefeller Center, N. Y., where it was acclaimed one of last season's whooping successes.

"The Ascending Dragon", a new mystery play with Cardini, will commence at the Plymouth on Monday next.

Reviews and Previews

Architects to See Building Erected

Architectural Office Practice To Be Studied By First Year Students

First year students entering the School of Architecture at the Institute next week will come in immediate contact with the realities of their profession in a unique course in which they will plan and supervise the construction of a modern house. The new course will for the first time bring to architecture the laboratory method which has proved so successful in science and engineering.

The new plan of instruction will include the selection and purchase of a suitable lot, making plans and specifications for a moderate size house, selecting a building contractor, and supervision of every step of construction. The work will be carried out with the constant assistance and supervision of the faculty. Upon completion the house will be sold, and the proceeds used to purchase a new location and finance the building of another house for the next year's class.

During the first few weeks of the opening term the class will become familiar with various phases of architectural office practice. They will then make a study of the proposed location, taking into consideration such economic and social factors as transportation, real estate values, taxes, mortgages, deeds, building laws, surveying, and methods of financing. An important feature of the course will be a series of lectures by outstanding authorities in many fields relating to domestic archi-

Net Tournament Will Start October Fifth

The fall tennis tournament will commence October 5, on which date the drawing will take place. Entries will be made by signing the list on the bulletin board in the Main Lobby. The early start has been planned in order to finish before cold weather.

The prize this year will be a large engraved cup. This contest is opened to all undergraduates, including freshmen and there is no entry fee.

tecture. The work will be further supplemented by individual research and visits to various types of residences.

At the beginning of the second term, the students will prepare preliminary scale sketches for a house to be erected on the chosen lot. This will be developed into a final problem, and the best design chosen as a basis for the house to be built by the class.

From that point on the course will parallel still further the office practice of an architect. Working drawings and specifications will be prepared for the final estimate, bids obtained, and the contract let. The house will be started, and the actual construction followed by the class in every detail. Studies of interior color schemes and landscape treatment of the grounds will complete the project. The house and lot will then be turned over to the Institute authorities for sale.

The plan is expected to do much to stimulate the beginning student's imagination and interest, and to give him a grasp of the many varied problems of his profession, which usually are encountered only after an architect begins his professional career.

The Tech, Nine Years Ago, Describes First T.C.A. Frosh Camp

Eighty Attend Camp Massapoag For Preview Of Life At Institute

Editors Note: This story is taken from the September 27, 1926 issue of The Tech, and describes the occurrences at the first Freshman Camp—held that year.

A group of eighty freshmen, activity leaders, and faculty members left Walker Memorial, Friday afternoon (September 24, 1926) about 3 o'clock for the Cambridge Y.M.C.A. camp at Lake Massapoag for the first freshman get-together camp in the history of Technology.

Traveling in busses, they arrived at the camp about 4:30 o'clock, and many immediately refreshed themselves from the journey with a swim in the lake. After supper several announcements were made regarding the procedure at the camp, and at 8 o'clock the group assembled for entertainment. James A. Lyles, '27, president of the Senior Class, presided. Orville B. Denison, '11, Secretary-treasurer of the Alumni Association, entertained with songs and cheers, instructing the freshmen in Technology's traditional songs.

Saturday morning, James A. Lyles explained the purpose and duties of

the Institute Committee and introduced the heads of the various activities who spoke a few words in explanation of the work of their particular activity. At 10:45 o'clock Dr. Henry P. Talbot, '85, Dean of Students, delivered the morning address. Dr. Talbot stated that he was strongly in favor of activities at the Institute and stressed the importance of getting interested in some form of extra-curricular work.

He also told of the "hands off" policy which the faculty had maintained for practically fifty years, there being only two instances of faculty intervention during this period, and these of a minor nature. He stated that in many cases the Dean's office—which includes Assistant Dean Harold E. Lobdell, '17—acted as a buffer in preventing the faculty from interfering in student affairs.

The afternoon program included an athletic program. After supper John H. Field, '27, president of the M.I.T.A.A., explained the nature of Field Day and stressed the importance of supporting the Field Day teams. He also outlined the duties of the various departments of the M. I. T. A. A.

Merely girdling or felling trees affected with heart rot will not eradicate the disease, says a plant pathologist, because the fungi causing the rot will not live in the dead stumps and trees for more than five years.

Coach Will Meet Frosh Candidates

Freshman Cross Country Practice To Start On Monday September 30

All freshmen interested in going out for track and field events are to report to Coaches Hedlund and Bowie at the Track House next Monday or Tuesday afternoon. Freshmen Cross Country practice starts on September 30, and it is necessary that all candidates come out early and start building themselves up for the competition which they will face later in the season.

Freshman track men are given ample opportunity to compete during the school year. Every Saturday afternoon inter-class handicap races are held, and at larger intervals during the season, Tech frosh are given opportunity to show their mettle against other schools.

Annual Soph-Frosh Relay

The big event of the Fall is the freshman and Sophomore Relay race held on Field Day, November 1. This event is an annual custom at Tech and is featured every Field Day. Field Day, is that annual day of reckoning between the first and second year men and includes also football, crew, tug-of-war, and the

Frosh Camp

(Continued from Page 1)

acquaint the incoming students with the members of their own class, the officials of Technology, and Technology life and activities. There are facilities for riflery, baseball, swimming, crew, lacrosse, track, basketball, volleyball, and football during the many athletic hours on the schedule, and the rest of the time will be taken up with talks and get-acquainted gatherings. Elsewhere in this issue will be found a detailed program of events.

Kinsolving will attend

As has been the custom for many years, the counsellors, who this year will number thirty-five, have been

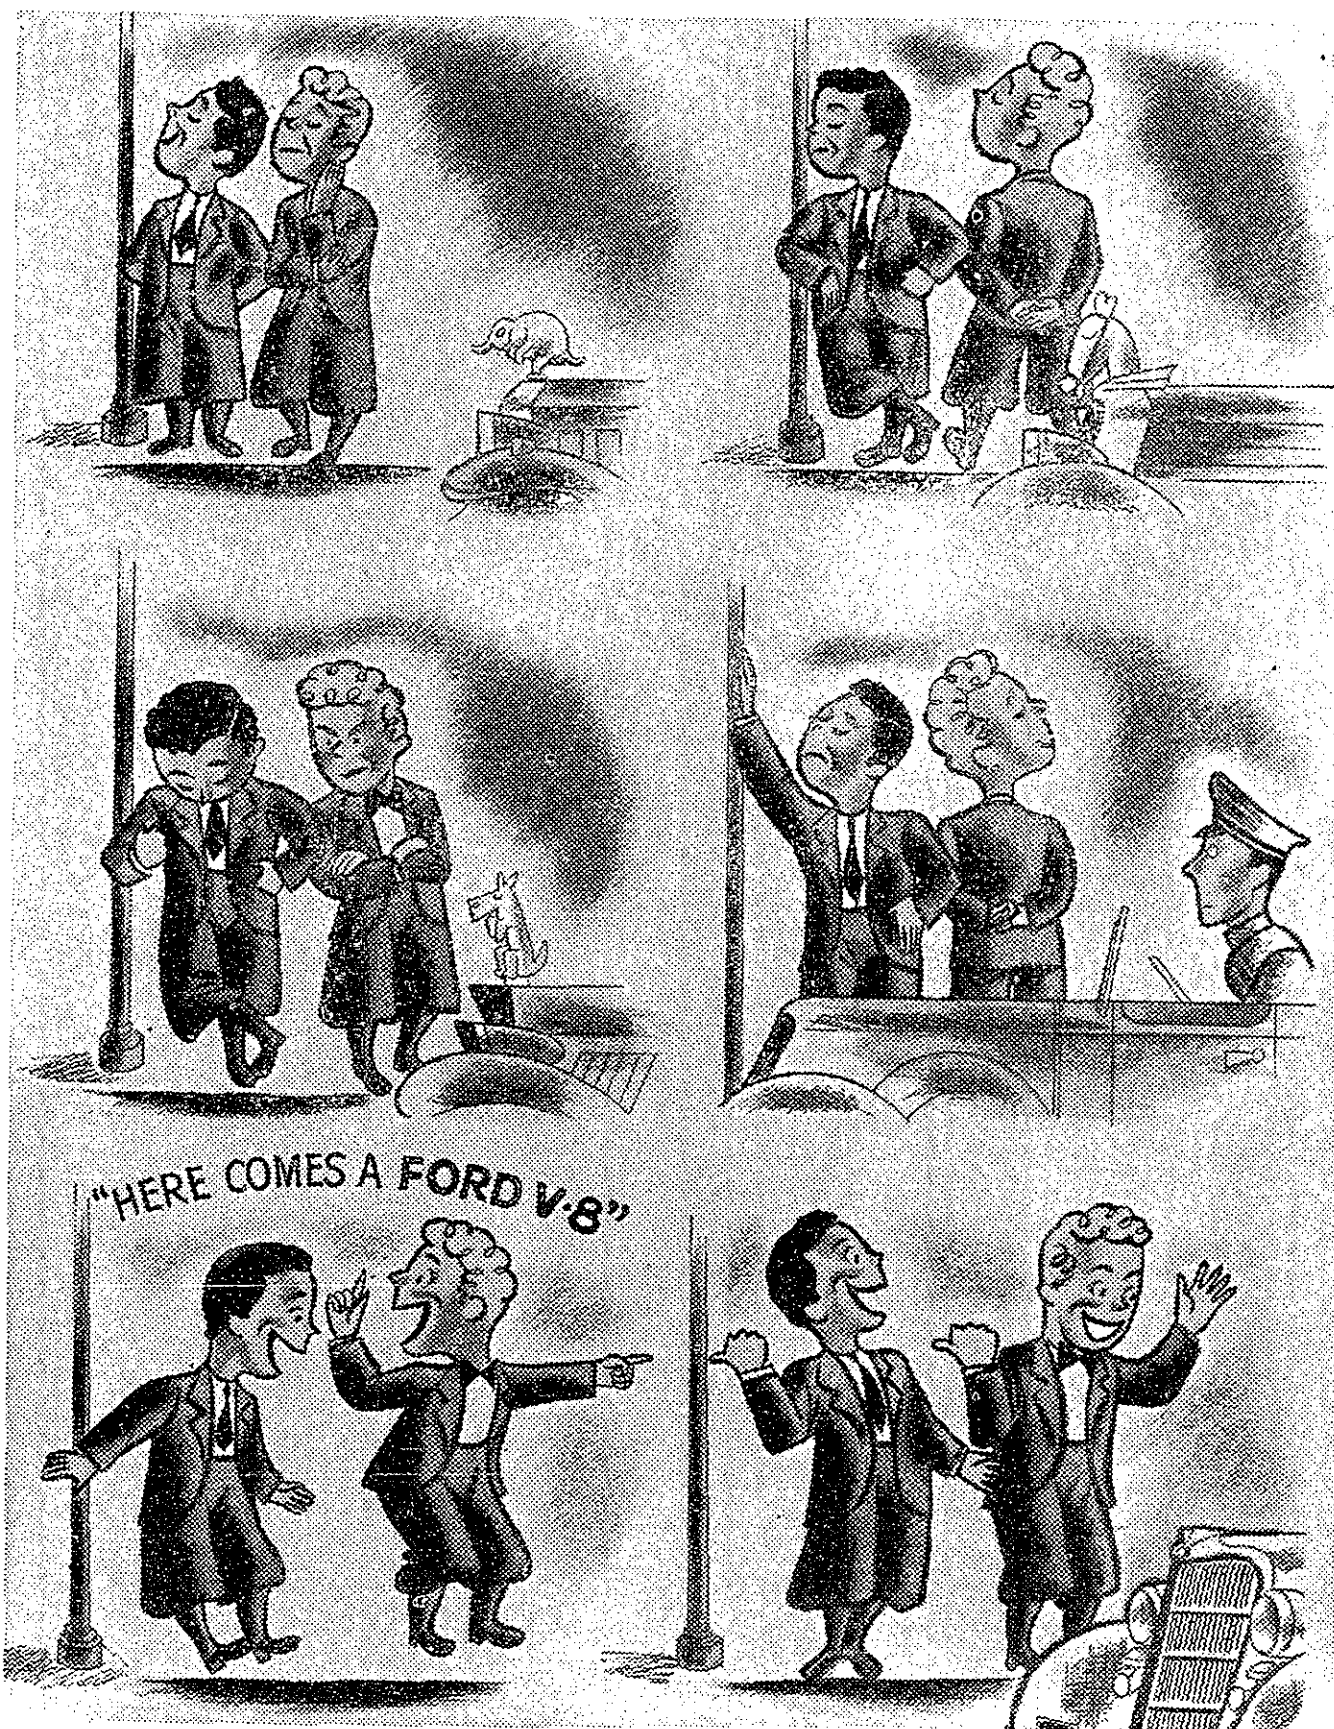

chosen from among the activity leaders of the Institute. They will include the class presidents, general managers of the publications, captains of the athletic teams, and the presidents of the Tech Union, 5:15 Club, T.C.A., M.I.T.A.A., and the Dorm Committee. In addition to these and the 250 freshmen registered, there will be fifteen others among whom will be E. E. Kattwinkel, '23, former General Manager of the Tech, and at present a member of the T.C.A. Advisory Board. Also among the guest speakers will be Dr. Arthur L. Kinsolving, Rector of Trinity Church, Boston. This year will mark his first appearance at Technology's Freshman Camp. In the past he delivered the opening address at Deerfield Academy which talk interfered with the camp, but this year he has been able to

arrange his program in such a manner as to allow his presence at Lake Massapoag.

Five Blankets Per Man

In order to accommodate the group of future engineers who will attend the Cambridge Y.M.C.A. camp, the directors have arranged with the army to furnish them 1500 blankets, 300 mattresses, 300 pillows, 160 cots, and 14 tents. This will allow five blankets per man, one more than has been the custom in past seasons.

Speeding the departure of the camp from Walker Memorial, there will be two tables at which registration takes place, one for men whose last names begin with the letters A-K and the other for the remainder of those registered.

Influx of Baggage Heralds Opening

Students' Luggage Delivered To School Residences

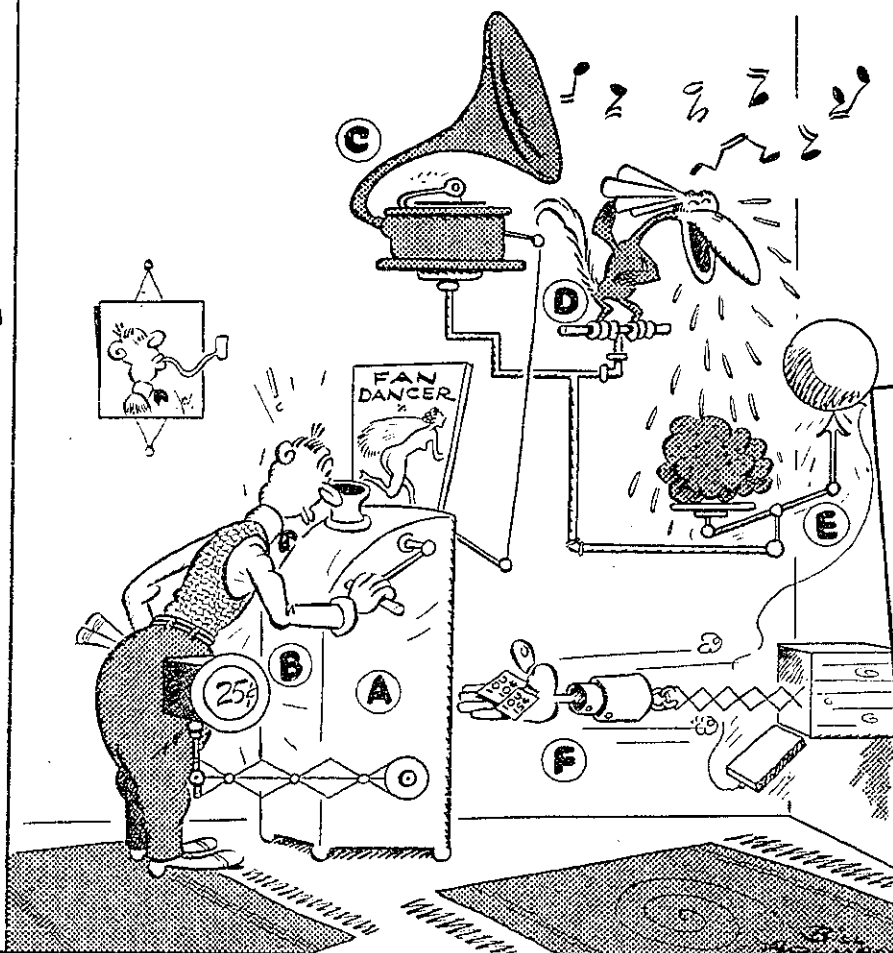

With the re-opening of the Institute there has been a constant influx of trunks and baggage to the dormitories and fraternities from the offices of the Railway Express Agency.

This company is assisting many students to make the trip from home back to school as easily as possible by picking up the baggage at home and depositing it at the dormitories or the fraternity houses. Express facilities are taxed by both the September and June peak loads, but such is the reserve of this national organization that it can easily handle the excess of these periods in one smooth operation.

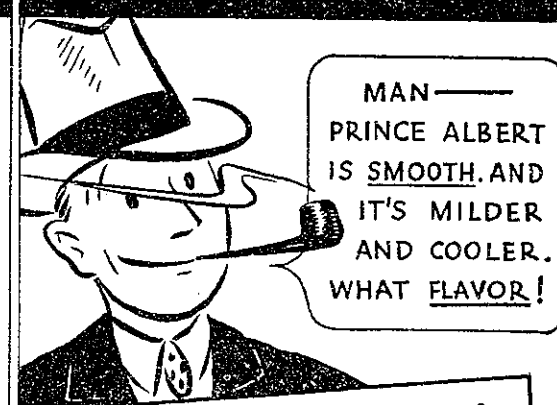

Even after the delivery of all the trunks and other baggage connected with the opening of the school year the express agency continues to be of service to the college students shuttling hundreds of laundry cases between Cambridge and the student's homes. The bundles are picked up and receipted for at the dormitories, saving the weekly trudge to the Kendall Square post office.

EASY WAY TO MAKE A TOUCH

STUDENT ARRIVES IN ROOM. TURNS CRANK IN MOVIE MACHINE (A) AND SEES FAN DANCER. X-RAY MACHINE (B) INSPECTS STUDENT'S POCKET AND DISCOVERS 25¢. "Life" Included In Gridiron Offer

Subscriptions To Be Taken On Registration Day In Main Lobby

For only twenty-five cents extra, the subscribers to the Gridiron offer this year will receive eight issues of Life, the popular monthly magazine, The Tech, Voo Doo, T.E.N., and Technique are included in a single price of seven dollars and fifty cents.

Through the combined efforts of the staffs of the respective publications this offer is made at what is felt to be a reasonable price. Brenton W. Lowe, '36, President of Gridiron urges all men to subscribe soon, since deferred payments will not be accepted after registration day.

For the benefit of the new students, the Gridiron wishes to make it clear that the charges are solely for cost of publishing the different organs, in-

asmuch as no member of the staffs receives compensation for his work in connection with writing or obtaining advertisements.

Gridiron will conduct a sales campaign on registration day, September 30, in the Main Lobby and a representative will be there to accommodate those who wish to place their orders. Those who have already placed their Gridiron offers and wish to receive Life may pay an additional twenty-five cents.

Soph President

(Continued from Page 1)

At the last freshman camp the ducking of the Sophomore President was delayed by the martyrdom of his faithful vice-president, who was confused by the freshmen for the actual culprit. However, a few minutes later he was discovered, pounced upon and after a short struggle was half dragged, half carried to the float where he pulled two freshmen along with him into the lake.

Who's Who at Freshman Camp

(Continued from Page 5)

George Robinson, President of the 5:15 Club.
Claxton Monro, President of the Tech Union.
John Mason, Manager of the Crew.
Walter Wojtczak, Manager of the Track Team.
Robert E. Worden, Chairman of Freshmen Rules Committee.
James H. Carr, Chairman of Freshman Dormitory Advisors.
Arthur Dolben, Varsity Crew Member.
Arthur R. Hunt, Cox of the Varsity Crew.
Scott Rethorst, President of the Inter-Fraternity Conference.
Douglas Chalmers, Captain of the Cross-Country Team.
Richard Vincens, Jr., Co-Desk Editor of The Tech.
Alfred E. Busch, Manager of Tennis and Squash.
Harry Essley, President of Tau Beta Pi.
Allen W. Horton, Chairman of the Budget Committee.
William W. Garth, Representative of the All Tech Smoker.

Incoming Students Number Over 600

Total Enrollment Will Increase Two Or Three Percent Says Kimball

An even larger freshman class than last year is expected according to Assistant-Registrar R. M. Kimball. Although exact figures will not be available until the third day of the term, indications point toward an enrollment of 600 in the class of 1939.

Last year's freshmen numbered 542, part of the Institute's total of 2507 students. Just as the class of 1938 outnumbered the class of '37, this year's freshmen will exceed the Sophomores by 50 or 60 men. The total enrollment of the Institute will range between 2550 and 2600 an increase of two or three percent. Since about one-third of the total registration is entered in the final two days allowable, more accurate figures will be lacking until the second day after registration.

Track Call

(Continued from Page 4)

glove-fight. Twenty-four men are needed in the Relay race from each class and Coach Hedlund will be on the lookout both at Freshman Camp and at the Track House for men of sufficient calibre for the race.

The opportunity of substituting track for physical training is also offered.

Journalism Course Again Led by Fassett

A special English Journalism Course, to be substituted for the regular freshman English course by those who are candidates for the T.E.N. or The Tech will be given again this year by Professor Frederick G. Fassett, Jr. All candidates for the aforementioned publications are urged to see Professor F. G. Fassett as soon as possible in his office, Room 2-277 to register for the course.

The course will include newspaper writing and editing, and magazine writing.

Frosh Camp

(Continued from Page 5)

The feature of the athletic program will be a faculty counsellor, indoor baseball game, which will take place Saturday afternoon at 4:15 o'clock. It is expected that the following men, among others, will be on hand either to participate or to cheer: President Karl T. Compton, Vice-President Vannevar Bush, Director of Admissions James I. Tryon, Dean Harold E. Lobdell, Assistant Dean Thomas P. Pitre, Treasurer Horace S. Ford, Bursar Delbert I. Rhind, Professor Earl B. Millard, Professor Leicester T. Hamilton, Professor Henry G. Pearson, Professor Charles E. Locke, William Jackson of the Institute Information Office, Registrar Joseph C. MacKinnon, Assistant Professor Nathaniel H. Frank, Colonel Samuel C. Vestal, Colonel Robert Arthur, Ralph T. Jope of the Technology Review, Professor George Owen, Professor Raymond D. Douglass, and Professor Samuel C. Prescott.

Freshman Rules

(Continued from Page 1)

Rules. For this reason, the rules are designed not to humiliate the freshmen, but to enable them to become more easily acquainted with the Institute and the student body and to know the members of their own class.

The Freshman Rules requires that (1) every freshman wear a Freshman tie while on the Institute grounds, and (2) that he speak to the members of the faculty upon meeting them, and tip his hat upon meeting the President or Dean of the Institute.

To reprimand freshmen for lack of class spirit, a board composed of the following will act as a court: President of the Senior Class, Chairman of the Dormitory Committee, Chairman of the Interfraternity Conference and Chairman of the 5:15 Club.

The leaves of Turkish tobacco are strung one by one like beads (see how it is done in the picture). After the leaves are strung they are packed in bales (see picture) —sometimes as many as 80,000 leaves to the bale.

We have on hand at all times
for CHESTERFIELD cigarettes
upwards of 350,000 bales
of Turkish tobacco...

The pleasing aroma and flavor of Turkish tobacco is almost necessary if you want a good cigarette.

Turkish tobacco is more costly when you take into account that you have to pay 35c a pound duty, but we have to have it to blend with our mild ripe home-grown tobaccos.

It helps make Chesterfields milder, it helps give them better taste. *Just try them.*

Outstanding
.. for mildness
.. for better taste
